

Community Health Update - October 23, 2020

Dear Residents:

We are writing to inform you of three new staff cases of COVID-19 on our campus. These three cases are isolated incidents - the exposure events for each employee are not related and the employees have not interacted with one another in any way. For the sake of clarity, we will number each case.

Case #1 - This employee does not work in Assisted Living or the Convalescent & Rehabilitation Center. They have not been on campus since October 12th. They have been working at home in order to address a personal matter that is unrelated to COVID. The exposure occurred at a family event outside of work. Contact tracing has been completed and there is no exposure concern for other staff or residents.

Case #2 - This employee works in the Convalescent & Rehabilitation Center. They have not been on campus since October 15th. The exposure occurred during close contact with a friend who later tested positive. Upon hearing of this, the employee reported it to their supervisor and began isolation at home. Contact tracing has been completed and there is no exposure concern for other staff or residents. Additionally, we have notified the Department of Health and, because the exposure occurred after the employee last visited campus, they are not advising additional safety measures at this time.

Case #3 - This employee works in Assisted Living. They are asymptomatic but we received their positive test result through the most recent round of tests conducted for all AL staff and residents. Upon receiving this positive result, the employee immediately went home to begin isolation. Contact tracing is underway. We are confident that there is minimal risk of additional exposure from this employee due to the extensive infection control measures we have in place for Assisted Living.

Assisted Living Update

As required by the Department of Health, all Assisted Living residents and staff were tested a 3rd time this week. Because this round of testing revealed a positive case of the virus, our outbreak status has been extended and weekly testing will continue.

Resolved Cases of COVID-19

We have modified the case tracker to reflect active cases only, rather than cumulative cases. A case is considered active until symptoms have improved and the Department of Health has cleared the person to resume normal activities.

COVID-19 Active Case Tracker:

- **3** staff cases
- **0** resident cases in the Convalescent & Rehabilitation Center
- **1** resident case in Assisted Living
- **0** resident cases in Independent Living

In Closing

The recent increase in case occurrence on campus and in the greater community can be alarming. We find reassurance in the fact that each case on campus has been contained as a result of everyone following the universal precautions while at Panorama. Additionally, further cases have been prevented by the integrity of individuals who were forthcoming with their exposure concerns. The virus continues to be a constant threat but we are keeping each other safe by staying diligent in wearing our masks properly and maintaining physical distance.

Updated Testing Resources

Testing Site	Location	Scheduling	Hours
<i>Providence Hawks Prairie Family Medicine Clinic - Lacey</i>	Drive-through clinic behind Providence 2555 Marvin Rd NE	No appointment necessary. You may call (360) 493-7800 or (360) 438-6800 to talk with a triage nurse. You do not have to be a Providence patient to get tested.	Open 9:30am to 4:30pm Monday – Friday
