

## Community Health Update - February 22, 2021

### STAFF MEMBER TESTS POSITIVE FOR COVID-19

A staff member who serves in a variety of departments has tested positive for COVID-19. The employee last worked on Saturday, February 20th and left campus to get tested immediately upon hearing from a friend about a potential exposure from activities outside of work. The employee is experiencing mild symptoms. Contact tracing has been completed.

Because this employee's role includes time in the Convalescent & Rehabilitation Center, we are awaiting guidance from the Department of Health. In the meantime, C&R staff are proceeding with precautionary measures consistent with Outbreak Status. This includes:

- Residents are isolating in their rooms with limited movement in the hallways. All dining and therapy services must take place in the resident's room.
- Compassionate care visits can continue as approved by C&R leadership.
- No new admissions are being accepted.

Now that a large portion of our campus has been vaccinated, we recognize cases of positivity may raise questions about an individual's vaccination status or the effectiveness of the vaccine. In accordance with individual confidentiality, we cannot share the vaccination status for any employee or resident. Additionally, it's important to remember that the vaccine is not 100% effective. It is still possible to transmit the virus and therefore we must all continue to use caution.
