

Community Health Update - May 21, 2021

STAFF MEMBER TESTS POSITIVE FOR COVID-19

An additional staff member of the C&R has tested positive for COVID-19. This employee last worked on Wednesday, May 19th. They do not have any symptoms of illness at this time. We received the positive result yesterday as part of our regular surveillance testing, which was conducted for all C&R staff and residents earlier this week. The remainder of those test results were also received and they are negative, for both staff and residents.

As advised by the Department of Health, our C&R is now in Outbreak Status. This includes the following measures until the Department of Health says otherwise:

- No new admissions are permitted.
- No group dining or activities are permitted.
- No in-person visitation is permitted.
- All C&R staff and residents will be tested weekly.

COVID-19 Active Case Tracker:

- 2 staff cases
- 0 resident cases in the Convalescent & Rehabilitation Center
- 0 resident cases in Assisted Living
- 0 resident cases in Independent Living
